Summary

IT professional combining **software development** and **infrastructure**. I build internal JavaScript systems used in the company's daily operations and manage Active Directory, Microsoft 365 and L1/L2 support. Degree in Systems Analysis and Development.

Experience

Zona Azul Manaus

IT Assistant

Manaus, Brazil

Jul 2026 – Present

- Built the **route management system for the OCR-equipped vehicle fleet**, replacing paper-based planning with an intuitive web interface, real-time route tracking and a performance score based on the route and time driven. Stack: **React**, **Vite**, **Tailwind CSS**, **Node.js/Express**, **Socket.IO**, **SQLite**, **Google Maps** and **Routes API**, RBAC, an Android app with **Capacitor** and **Docker** deployment on Railway.
- Built the **cash register control system**, eliminating the daily manual filling of a spreadsheet with about 80 rows and columns and cutting the work from hours to **3–5 minutes** (over **95%** productivity gain). Stack: **React**, **Recharts**, serverless **Node.js/Express** on **Vercel**, **Supabase** (PostgreSQL and Auth) and **Redis**.
- Automate administrative workflows with **Microsoft Power Automate**, eliminating repetitive manual tasks.
- Manage **Active Directory** on **Windows Server** and **Microsoft 365** (licenses, Exchange, Teams, OneDrive and SharePoint), including accounts, groups and permissions.
- Provide **L1 and L2 technical support** for hardware, software, network, printers, access and corporate systems.
- Write operating procedures and technical documentation to standardize IT activities.

Zona Azul Manaus

Junior IT Assistant

Manaus, Brazil

Jan 2025 – Jun 2026

- Implemented **Snipe-IT** to manage over **350 IT assets**, replacing scattered spreadsheets and centralizing location, owners, movements and equipment history.
- Developed the department's first **internal JavaScript systems** and Power Automate automations.
- Supported the administration of AD, Microsoft 365 and SharePoint and provided L2 user support.

Zona Azul Manaus

IT Intern

Manaus, Brazil

Jul 2024 – Dec 2024

- Developed a **customer service chatbot** with **Meta Business** and the **official WhatsApp API**, automating answers to frequently asked questions.
- Provided **L1 helpdesk** support and performed preventive and corrective maintenance and upgrades on computers.

Skills

- **Front-end:** JavaScript, React, Vite, Tailwind CSS, shadcn/ui, Recharts, HTML and CSS.
- **Back-end:** Node.js, Express, REST APIs, Socket.IO (WebSocket), session-based authentication and RBAC.
- **Databases:** PostgreSQL (Supabase), SQLite, MySQL and Redis.
- **Cloud and DevOps:** Docker, Vercel (serverless), Railway, Cloudflare, Git and GitHub.
- **Mobile and maps:** Capacitor (Android), Google Maps Platform (Maps, Routes and Geocoding API), Java and Kotlin.
- **Infrastructure and support:** Active Directory, Windows Server, Microsoft 365, SharePoint, Power Automate, Snipe-IT and L1/L2 support.
- **Methodologies:** Scrum and Kanban.
- **Languages:** Portuguese (Native) and English (B2 – Upper Intermediate).

Education

UNIESBAM – Centro Universitário ESBAM

Associate Degree in Systems Analysis and Development

Manaus, Brazil

Jun 2023 – Dec 2025

- Student lead of the program's community outreach project: organized the team's activities and deliverables and the communication with advisors and coordinators. The project received the **top grade (10/10)**.

FUCAPI – Fundação Centro de Análise, Pesquisa e Inovação Tecnológica Manaus, Brazil

Technical Diploma in IT, Programming Track

Jul 2022 – Dec 2023
